

# How to access the Telegram bot *RelintBot2*

Pablo Valdunciel Sánchez

May 15, 2020

## 1 Download Telegram

In case you do not have the Telegram application installed on your mobile phone, please download it and install it.

- [Android](#)
- [iOS](#)

## 2 Search for the bot

Once you have installed the Telegram application on your mobile phone, you must search for the corresponding bot. If you are reading this document from the device on which you have installed the Telegram application, click on the link to access the bot:

1. [RelintBot2](#)

Otherwise, access the Telegram search bar by clicking on the lens that appear in the upper right corner of the screen and type the name of the bot (***RelintBot2***), as it is shown in *Figure 1*.

Click on the bot's name. A screen like the one seen in *Figure 2* will appear. Press the **START** button. You can now talk to the bot!
